cookiecutter-postgres-extension documentation

Release 04b570c

Florents Tselai florents@tselai.com

Dec 05, 2023

CONTENTS

The missing cookiecutter for a Postgres extension

- Pre-populated extension files (`Makefile, .control, ,c, .h, .sql`)

- Tests

- Build on multiple Postgres versions with GitHub Actions

- Docker support

- pgxn integration

INSTALLATION

You'll need to have cookiecutter installed.

```
pip install cookiecutter
or
python3 -m pip install cookiecutter
```

USAGE

Run `cookiecutter gh:Florents-Tselai/cookiecutter-postgres-extension` and then answer the prompts.

The prompt answers will be used to populate the standard Postgres extension files
